Introducing the new 24/7 California Substance Use Line: Free, confidential, *clinician-to-clinician* consultation on substance use evaluation and management

Call 1-855-300-3595 Mondays – Fridays, 6 am – 5 pm PT;
For time-sensitive questions during evenings and weekends, call 1-800-222-1222
(*non-urgent questions can also be submitted online: nccc.ucsf.edu*)

California is pleased to announce its new “California Substance Use Line”, offering point-of-care guidance on substance use evaluation and management. This service is open to any health care provider in California, and involves a new collaboration between California’s Poison Control System and the Clinician Consultation Center’s Substance Use Warmline.

With special expertise in medications for opioid use disorder, our addiction medicine-certified physicians, clinical pharmacists, and toxicology experts provide guidance based on established treatment guidelines, up-to-date evidence, and clinical best practices.

The California Substance Use Line is a joint program of the National Clinician Consultation Center and the California Poison Control System through the Substance Abuse and Mental Health Services Administration (SAMHSA) State Targeted Response to the Opioid Crisis Grant to the California Department of Health Care Services (DHCS)

24/7 California Substance Use Line

Clinician-to-clinician consultation and decision support

1-855-300-3595 (Mondays-Fridays, 6 am – 5 pm PT)

1-800-222-1222 after hours, weekends and holidays

Our consultants can help:

- Develop comprehensive treatment plans for special circumstances including pregnancy and postpartum, pediatric opioid withdrawal, HIV and viral hepatitis
- Identify cases of opioid withdrawal and advise on buprenorphine dosing to treat withdrawal
- Provide guidance on treatment of precipitated withdrawal
- Troubleshoot care transition planning to bridge patients to outpatient treatment
- Improve medication safety to help decrease risks of harm, including overdose
- Discuss useful care and communication strategies regarding substance use and pain
- Support any clinician caring for patients with substance use disorders, chronic pain, and behavioral health concerns

You can request a DATA 2000 Waiver Training on pcssnow.org:

<https://pcssnow.org/medication-assisted-treatment/>

The screenshot shows the PCSS website navigation and content. The top navigation bar includes 'NEWS', 'CALENDAR', 'NEWS SIGN UP', and 'CONTACT'. A secondary navigation bar highlights 'MAT WAIVER' among other options like 'ABOUT', 'EDUCATION & TRAINING', 'MENTORING', and 'RESOURCES'. The main content area features a 'Print' button and a paragraph explaining MAT: 'Medication Assisted Treatment (MAT) of Substance Use Disorders involves a combination of a medications that targets the brain, and psychosocial interventions (e.g., counseling, skills development) aimed at improving treatment outcomes. Research shows that medications and therapy together may be more successful than either treatment method alone.' Below this, it says 'Learn about MAT Waiver Training for:' followed by three buttons: 'Physicians', 'Nurse Practitioners', and 'Physician Assistants'. A paragraph follows: 'While PCSS provides trainings on a broad range of substance use disorder treatments, its primary focus is on treatment of opioid use disorders (OUD). Opioids include a class of drugs often prescribed for pain—morphine, fentanyl, oxycodone, and hydrocodone—as well as illicit drugs, such as heroin. The Federal Drug Administration (FDA) has approved three medications for the treatment of OUD: methadone, buprenorphine, and naltrexone.' Another paragraph states: 'The introductory module below is a case-based discussion of the general approach to evaluation and treatment of patients presenting with problematic opioid use. Benefits and limitations of available medications and differences between them are described. An approach to choosing first and second line treatments is also presented.' At the bottom, a button reads 'Introduction to Medication Assisted Treatment (MAT)'. On the right side, there is a 'Mentoring' section with a photo of a man and text: 'Designed for health professionals treating individuals with OUD or prescribing opioids for pain. Our experts provide support by phone, email, or in-person if logistically possible.' Below this is a 'Request a Mentor' button.

While PCSS provides trainings on a broad range of substance use disorder treatments, its primary focus is on treatment of opioid use disorders (OUD). Opioids include a class of drugs often prescribed for pain—morphine, fentanyl, oxycodone, and hydrocodone—as well as illicit drugs, such as heroin. The Federal Drug Administration (FDA) has approved three medications for the treatment of OUD: methadone, buprenorphine, and naltrexone.

The introductory module below is a case-based discussion of the general approach to evaluation and treatment of patients presenting with problematic opioid use. Benefits and limitations of available medications and differences between them are described. An approach to choosing first and second line treatments is also presented.

Working with communities to address the opioid crisis.

- ✧ SAMHSA's State Targeted Response Technical Assistance (STR-TA) grant created the *Opioid Response Network* to assist STR grantees, individuals and other organizations by providing the resources and technical assistance they need locally to address the opioid crisis .
- ✧ Technical assistance is available to support the evidence-based prevention, treatment, and recovery of opioid use disorders.

Funding for this initiative was made possible (in part) by grant no. 6H79TI080816 from SAMHSA. The views expressed in written conference materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services; nor does mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.

Working with communities to address the opioid crisis.

- ✧ The Opioid Response Network (ORN) provides local, experienced consultants in prevention, treatment and recovery to communities and organizations to help address this opioid crisis.
- ✧ The ORN accepts requests for education and training.
- ✧ Each state/territory has a designated team, led by a regional Technology Transfer Specialist (TTS), who is an expert in implementing evidence-based practices.

Contact the Opioid Response Network

- ✧ To ask questions or submit a request for technical assistance:
 - Visit www.OpioidResponseNetwork.org
 - Email orn@aaap.org
 - Call 401-270-5900
