

California Hub and Spoke System Presents

The Science and Practice of Treating Pregnant Women with Opioid Use Disorder

BACKGROUND

Opioid use disorder in the US continues to rise, including among women of childbearing age. Pregnant women with opioid use disorder face many barriers to care, including stigma, limited access to treatment, and fear of legal consequences. This half-day training is designed to assist health care providers caring for pregnant and postpartum women understand evidence-based practices to treat this vulnerable population. Speakers will cover the science and best practices in treating pregnant women with OUD and their infants, as well as a panel focused on case review and discussion.

APRIL 23, 2019

9:30 AM—1:00 PM

FHCS – HiTECH Building
5160 Federal Blvd
San Diego, CA 92105

APRIL 29, 2019

9:30 AM—1:00 PM

Redding Library
1100 Parkview Ave
Redding, CA 96001

APRIL 30, 2019

9:30 AM—1:00 PM

The San Jose Scottish Rite Center
2455 Masonic Dr
San Jose, CA 95215

MAY 13, 2019

Funding is made possible by the California Department of Health Care Services (DHCS) "MAT Expansion Project" through the SAMHSA Opioid STR Grant Program.

LEARNING OBJECTIVES

At the end of the training, participants will be able to:

- Evaluate three research-based practices to treat pregnant women with opioid use disorder (OUD).
- Consider barriers that may impede care for pregnant women with OUD.
- Summarize three signs of neonatal abstinence syndrome in opioid-exposed infants.
- Develop strategies to effectively diagnose and treat your pregnant or postpartum patient with OUD.
