Conference Goals

Welcome to the 11th Statewide Integrated Care Conference, held in Universal City, California, at the Hilton Universal Hotel on October 22-23, 2014. This year's conference theme is "Integrating Substance Use, Mental Health, and Primary Care Services in our Communities."

The neighborhoods we live in influence our behaviors and affect our health in profound ways. Social and economic features of our communities are linked to mortality, chronic conditions, health behaviors, mental health status, and substance use. Through the conference, we hope to bring together health, mental health, public health and substance abuse providers and services in neighborhoods across our region and highlight ways to strengthen partnerships across our diverse communities. Plenary and workshop sessions will address social and environmental determinants of health and explore ways to improve access to care through integrated and coordinated services and effective communication among providers.

Meeting the needs of our neighborhoods and communities means providing safe, effective, well-coordinated services that take into consideration the unique needs, values and cultures of those served. In this 11th Statewide Conference, we hope to further the original vision set-forth by the planning committee, and highlight the enormous transformation in health care delivery taking place in our state, and nationally, as we implement the Affordable Care Act. Our responsibility is to build upon existing relationships to improve access to and coordination of care among mental health, alcohol and drug treatment, primary care/health, criminal justice, education, child welfare, and other providers.

To this end, the conference goals are as follows:

- To help attendees recognize the importance of their local service agencies and networks toward improving healthcare integration and collaboration across addiction treatment, mental health, and primary care services.
- To help attendees identify the characteristics of services and providers that best support a resident's health, wellness, and recovery.
- To identify emerging best practices for treating the complex needs of those with comorbidities.

The 2014 Statewide Conference is, again, a 'green event.' All planning and execution efforts have been done with mindfulness toward our environment and resource sustainability. Conference planning, marketing, publicity, invitations and registration were created with this standard at the forefront. Attendees and Speakers are strongly encouraged to utilize electronic media for viewing hand-outs and materials.
